my_code:

```
a=input()
sum=0
list1=list(range(1,27))
for i in range(len(a)):
    if i==0:
        sum=sum+list1[ord(a[i])-97]+list1[ord(a[i+1])-97]
    elif i==len(a)-1:
        sum=sum+list1[ord(a[i])-97]+list1[ord(a[i-1])-97]
    else:
        sum=sum+list1[ord(a[i])-97]+list1[ord(a[i-1])-97]+list1[ord(a[i+1])-97]
print(sum)
```

Q.2) strong password → atleast have 8 char
atleast one upper, lower,
number, special.

else:
weak password.
